

ENVIRONMENTAL POLICY

Sportspark recognises that many of its activities provide an important opportunity to protect and improve the environment in which we work and serve our customers. Sportspark therefore attributes a high priority to the development and use of materials, products, processes and services that seek to reduce environmental damage and waste.

In particular throughout our business and in all our activities and in conjunction with our partner we will:

- Utilise, wherever economically viable, the efficient use of energy, water and materials, the sustainable use of renewable resources and the reduction of adverse environmental impacts
- Contribute to the conservation and protection of the natural environment
- Search for, propose and, wherever reasonably practical, adopt low-polluting technologies, processes and practices, employing environmentally sound waste management techniques such as: source reduction and improved specification, re-use, re-cycling and safe disposal
- Operate processes that are prescribed under the Environmental Protection Act 1990: Part 1 (Pollution Prevention and Control Act 1999), and observe the requirements laid down by The Environment Agency. All major incidents of environmental pollution involving Sportspark or its sub-contractors will be investigated and action taken to mitigate its effects and prevent re-occurrence. Any incident will be reported promptly as prescribed
- Expect our business partners, sub-contractors and major suppliers to share our concern for the environment, and to work with us in identifying and applying best practice
- Regularly measure key aspects of our environmental performance and periodically report progress against benchmarks and targets to all stakeholders: the University, partners, customers, employees, and the wider community

Sportspark will develop and implement an environmental management system (EMS), sufficient to ensure control of the environmental impacts arising from their activities. A report detailing progress against the EMS will be prepared at the end of each financial year.
